

Village Board Meeting

May 2024

Streets

- Mowing and trimming is underway
- Had to get Husqvarna mower fixed at Pangmans.
- Removed 32'x67' area of parking lot at the firehouse and regraded it to a 1% pitch towards the East lawn. CSP then came in and blacktopped that same area. We came back later that week and removed all the material we took out and also brought millings down to fill in the edges of the new blacktop.
- High St bridge project is complete. They were out of here on Friday. The ribbon cutting is set for the 31st of May.

Water

- Plant is running good
- We had our 3-day evaluation by the State DOH. They went through all steps of filtration. Took countless measurements of our filter media. Performed many in house tests including turb, color, and particle count, before and after filtration. Gathered 40 to 50 samples which were brought to Adirondack labs for testing. Did a “start to finish” evaluation of our plant and the process. Including tours and Q&As of our storage tank, reservoir, and well house.

Sewer

- The plant is running well.
- Mark failed his ABC exam, by one point! There is a 90 day wait time for a re-take. I emailed DEC and NYWEA and argued the case for a quicker re-take time of 45 days. He has another exam scheduled for the 18th of June.
